

Master 3500 Router

- 3000/6000 RPM
- 48V - 50/60 Hz
- 3,5 HP
- Rollers
- Water System

World's most trusted edge polishing router has been serving the fabricators for more than 30 years. This three-phase router takes your production to a new level and can work in your shop for decades.

Master Router Bits

- External Profiling
- Internal Profiling
- M8 & M10 Bolts
- Perfect gloss

Top tear quality router bits specially designed for the Master routers. Electroplated option available for positions 1 & 2. Scan corresponding QR code to discover all tools.

IW Router Bits

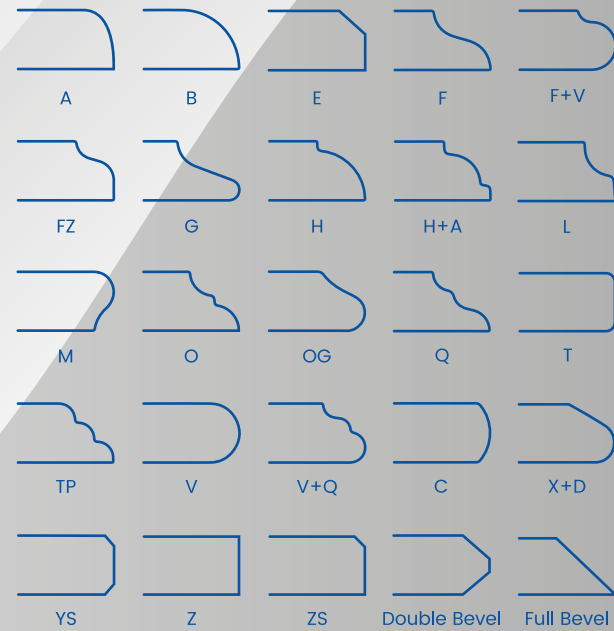

- External Profiling
- Internal Profiling
- Internal Water Option
- 22.2 mm fitting

The same technology for the Master router bits applied for miscellaneous routers with Internal Water system and 22.2 fitting. Electroplated option available for positions 1 & 2.

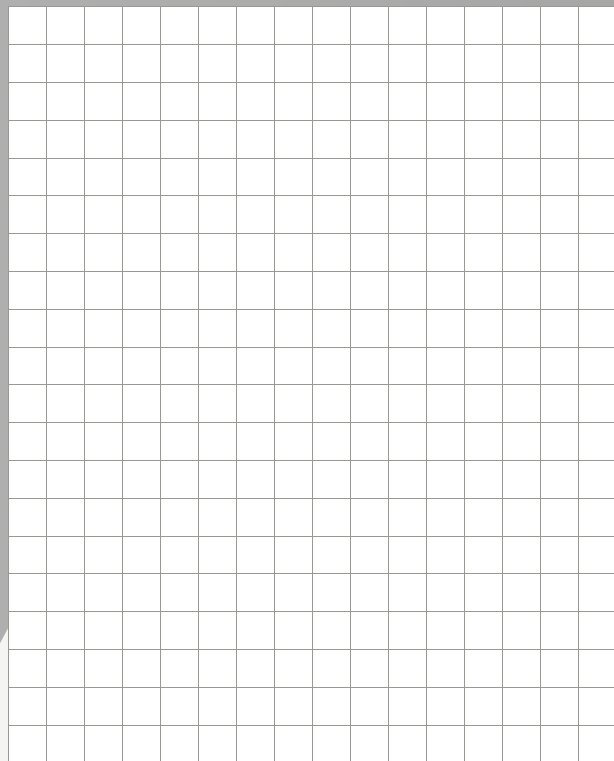

Segmented pre-cutting option available.

Profiles

All custom designed profiles are accepted.

Your Custom Designed Profile

5 x 5 mm

Product Guide

Finger Bits

A wide range of milling tools, specially designed for each and every application and material.

Core Bits

Thin crown and segmented core-bits and blind hole tools available in various diameters and lengths.

Grooving Tools

High-end grooving discs and bits available in various sizes. Polish the groove in only 3-steps.

Drainboard Gauging Wheels

Wide range of gauging wheels and angular edge kits ready to fit your production.

Line 10

Internal Profiling 5mm sharp edge 1/2" Gas fitting Perfect gloss

Specially designed kit for internal sharp edges of the sinks.

Line 20

Internal Profiling Line eliminator 1/2" Gas fitting Perfect gloss

Most popular line of CNC profiling tools for internal edge polishing available in various profile shapes.

Standard Nickel bond metallic tools available for positions 1 - 2 - 3. Scan corresponding QR code to discover all of the profiles.

Line 40

Internal Profiling External profiling Bore 22 fitting Perfect gloss

Smart choice for both internal and external edge polishing with a pre-cutting option.

Standard Nickel bond metallic tools available for positions 1 - 2 - 3. Scan corresponding QR code to discover all of the profiles.

Line 60

External profiling High feed rates Bore 35 fitting Perfect gloss

The fastest and most efficient line of edge polishing tools, with a large variety of profile shapes and pre-cutting options. Ø80 and Ø120 custom designed tools are accepted.

Optional pre-cutting tools for Line 60:

HYPER-Z SUPER Z

The fastest and most efficient super-Z tool in the market.

FRANCISTONE BREAKER

This multiple disc technology breaker helps increasing the life of your kit and decreases the production time.

RAZORSTONE PRE CUTTING

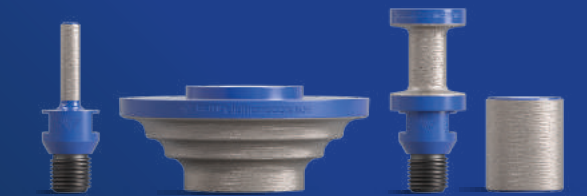

The multi-layer technology of these tools helps you to get your edge shaped before polishing.

Technologies

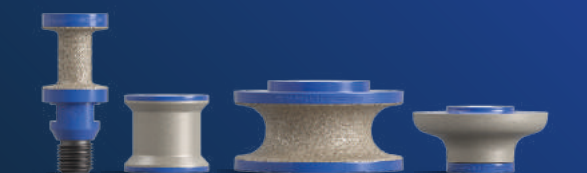

This patented technology is the symbol of Marmoelettromeccanica. The copper bond used in these tools allows you to work in high feed-rates. Available in metallic positions 1 - 2 - 3

ZENITH

The patented Nickel bond in these tools is among the hardest in the industry. Available in metallic positions 1 - 2 - 3

ELECTROPLATED

High-end quality diamonds specially designed for soft natural materials such as marble. Available in metallic positions 1 - 2

XTRAFINE

This technology is optional and allows you to have an extra metallic tool after the 3rd position. By using this tool you can have a finer finish and increase the life of your polishers. Available in metallic position (3X)

PERFECTOR

The Perfector tools are used on flat edges in order to eliminate the remaining lines. This oscillating tool is used before the last polisher (Position 6)
