We proudly represent one of the leading Italian companies in the metal-mechanical sector, specializing in manufacturing diamond tools for processing natural and synthetic stone.

Internationally acclaimed, we boast the highest number of patents, utility models, and industrial designs in the stone industry, filed, extended, and confirmed on a global scale.

# About Us

# Our Values

## Research & Development

With four decades of experience, we have consistently regarded research and development as integral to our company's growth and the enhancement of our proposed technologies.

Each year, we invest approximately 7% of our revenue in research to continuously offer innovative and technologically advanced solutions to our esteemed clientele. Through our research efforts and collaboration with CNC machine manufacturers, we have successfully optimized the operational performance of our tools, resulting in highly innovative and unparalleled systems.

Furthermore, we firmly believe in safeguarding our intellectual property, and thus, each of our groundbreaking **inventions is protected by certified patents.**

## Customer Focus

We are dedicated to delivering prompt and professional pre-sales and after-sales services to our clients worldwide, offering **specialized technical assistance and expert consultations** tailored to their unique needs.

At the launch of every new product, we showcase demonstrations conducted by technicians who regularly utilize our machines, either in our facility or at international trade events.

Moreover, we conduct **training activities** during the installation and testing of purchased machines, employing a team of qualified technicians to ensure optimal usage of our diamond products.

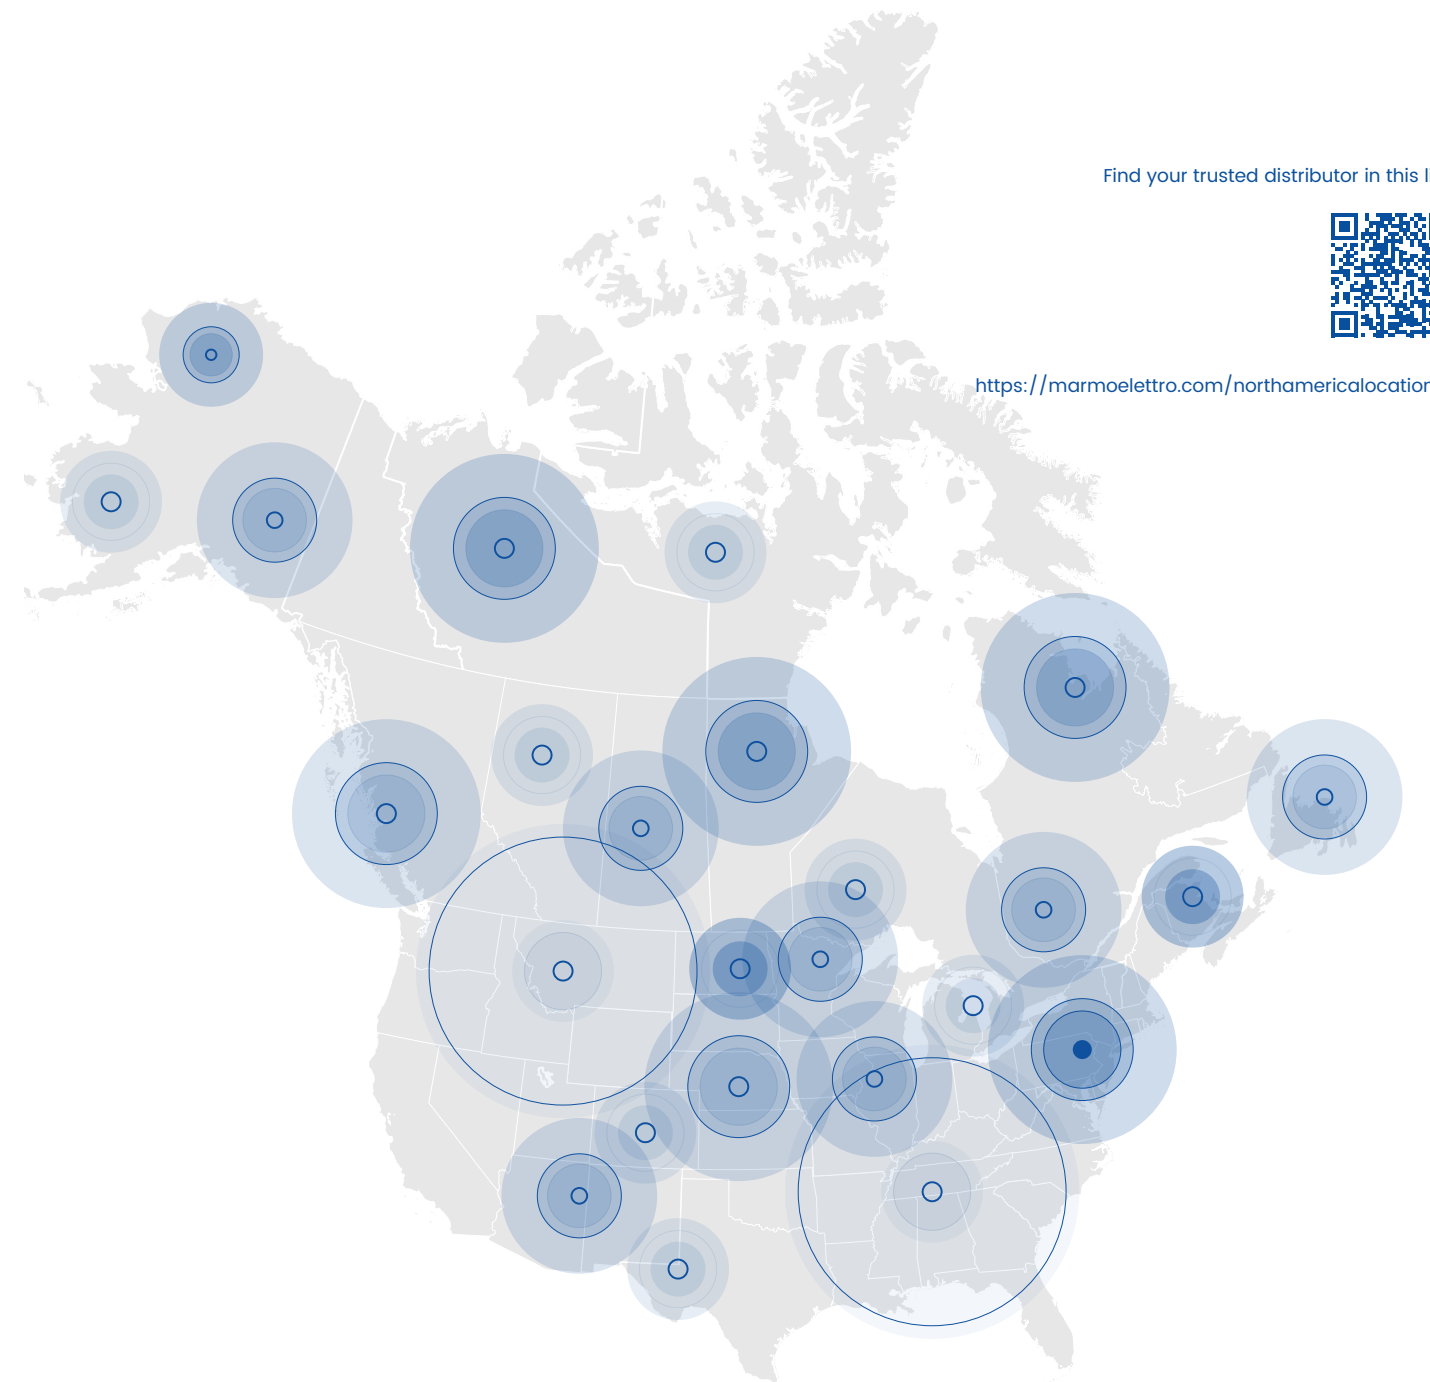

**Purchase from your trusted retailer and receive directly from our centralized warehouse in North America**

Find your trusted distributor in this link

**Retailer Locations**

# Large inventory of CNC Tools

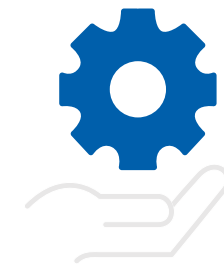

## North America Warehouse

### **Online Support**

Experience superior online support for diamond tools in CNC machines. Our experts provide real-time assistance, tailored recommendations, and innovative solutions for precision machining, ensuring optimal performance and productivity in every operation.

### **Onsite Support**

Elevate your CNC machining with our onsite support for diamond tools. Our experts bring tailored recommendations, real-time assistance, and innovative solutions to your location, ensuring optimal precision and productivity in every operation.

# **Customer Service & Technical Assistance**

Established in 1980 with the vision of simplifying and enhancing the processing of marble, granite, and natural stones, we have achieved our initial goals over the course of four decades and continue to strive for improvement through unwavering dedication.

Testimonials from thousands of operators worldwide stand as a testament to the validity, quality, and versatility of our products, all meticulously manufactured in strict compliance with international safety standards.

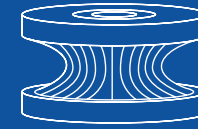

1989

**Rotating Toucher**

The simple but effective innovation which helped fabricators with guiding the router.

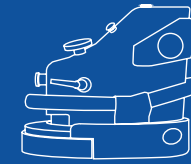

1990

**Diamanflex**

The first polishing wheels introduced using abrasive tapes.

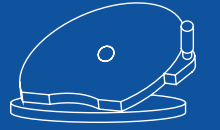

1992

**Master Router**

The first router with a water gliding system which eased the motion of the machines.

1995

**Master Lift Support**

After this innovation the routers were not only for external edges.

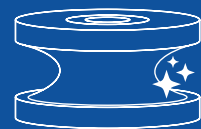

1997

**Water System Fixed**

The smoothest motion of the industry

1999

**Longlife Polishers**

The first diamond resin bonded polishing wheels introduced in the industry.

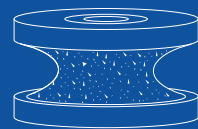

2000

**Frangistone**

Initial stock removal for profiles made simple.

2013

**EHS**

Our symbol of and the fastest metal tools in the industry.

2015

**Razorstone**

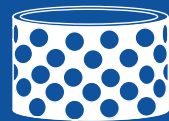

Helped fabricators to precut profiles faster than ever.

**Tripower & Pad3D**

5 Simple steps to achieve full polish.

2019

**Hyper - Z**

The best performing super-z tool

2023

**Longlife+**

The first rubber polishers upgraded to the best.

2024

**Glossforce 3.0**

The new generation of polishers which give a perfect homogenous finish.

2024

**Master 5000**

Revolutionized manual router

# Our History

# Certifications

Operating in adherence to rigorous standards, we have earned the prestigious **Quality Management System certification - UNI EN ISO 9001**. This commitment to excellence extends to health, safety, and environmental protection.

We firmly believe that our commitment to quality is the cornerstone of growth and competitiveness, and to that end, we invest in cultivating a highly qualified staff capable of independently managing all phases of production.

# Our Global Presence

Our extensive organizational structure spans across the globe, while our Italian roots remain integral to our identity. Through a team of specialized personnel and state-of-the-art computer systems, we connect with clients worldwide, providing exceptional service and support.

Thanks to the exceptional quality of our products and our flexible organization, we have rapidly captured markets worldwide, garnering enthusiasm and unequivocal approval from users everywhere.

We ensure the swift and efficient delivery of our products across the world through an extensive network of distributors, retailers, and franchises.

Every day, our sales representatives, technicians, and agents offer tailored solutions to meet the diverse needs of our clients, all made possible through our extensive **catalog featuring over 4.000 products.**

Welcome to the cutting-edge world of our diamond tooling catalog, where technology reigns supreme in the natural and synthetic stone industry.

As a pioneer in the field, our company is renowned for its patented and unparalleled innovations, consistently leading the way with groundbreaking advancements. Our array of cutting-edge technologies holds paramount importance as they directly influence the production outcomes for our valued fabricators, ensuring that our clients achieve nothing short of excellence in their craftsmanship and material processing.

Unleash the power of innovation with our cutting-edge diamond tooling solutions, where every tool promises to be a catalyst for transformative success in your stone fabrication endeavors.

# Technologies

# Frangistone

Step into the revolutionary world of Frangistone – a true game-changer in the stone industry! Crafted with multiple discs featuring small spaces in between, these awe-inspiring breakers are the ultimate epitome of efficiency and precision. Say farewell to wasted energy and time-consuming profiling struggles, as Frangistone effortlessly removes excess material with finesse. It proudly stands tall as the first-ever multidisc tooling innovation, setting the golden standard that others could only dream of imitating. Prepare to be amazed as Frangistone leads the pack, leaving competitors trailing in its trailblazing wake. Embrace the legend, embrace the future – Frangistone, where excellence meets innovation!

The space between the blades increases the tool efficiency.

### Performance

### Suitable for:

- Granite
- Ceramic and Quartz

### Position:

**00** - Breaker

### Available for:

# Razorstone

An innovative multidisc technology that shatters boundaries! Without any gaps between its blades, this precut marvel redefines precision, delivering an impeccable, finer finish that leaves spectators in awe. Embrace the future of stone fabrication as Razorstone elevates not only the quality of your work but also extends the longevity of your main set, making it a smart investment for excellence. Step into a realm where innovation seamlessly blends with craftsmanship, and experience the unparalleled efficiency that Razorstone offers – the tool that sets a new standard, giving your projects the leading edge they deserve.

## Performance

## Suitable for:

- ▲ Granite
- Ceramic and Quartz

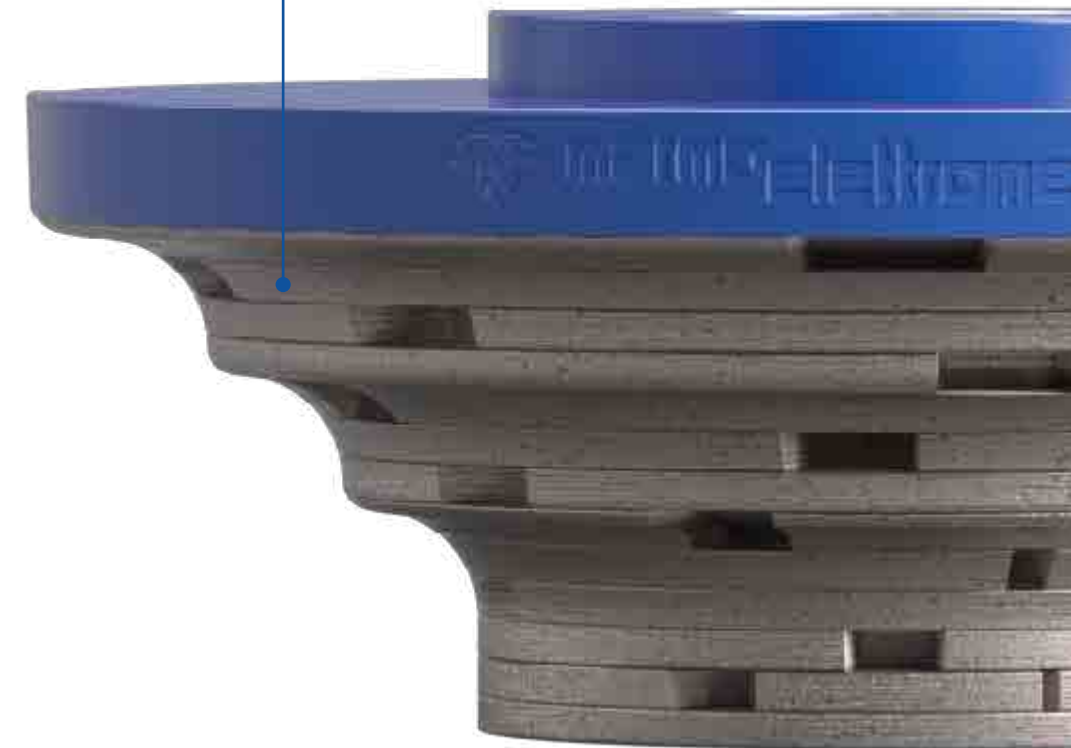

## Position:

- 0 - Pre-cutting

## Available for:

Without any gaps between its blades, this precut marvel redefines precision.

The specially designed holes help the lubrication and stock removal process.

# Hyper

“Hyper” – a revolutionary technology renowned for its unrivaled diamond bonds in the industry. Originally introduced through the remarkable Hyper-Z wheels, this innovation has redefined performance standards. Behold the sheer strength of these diamond bonds as Hyper tools outshine competitors, boasting an impressive six-fold increase in lifespan while performing tasks at a jaw-dropping five times the speed. Embrace the power of endurance and efficiency as “Hyper” propels your stone fabrication endeavors to unparalleled heights. Become part of the elite league of industry leaders, harnessing the true potential of “Hyper” technology for unmatched results.

### Performance

### Suitable for:

- Granite
- Ceramic and Quartz

### Position:

**Cleaner** - Pre-cutting

### Available for:

# Segmented

Segmented technology, a prevailing innovation in the stone fabrication industry, stands as a cornerstone of sintered advancements. It involves meticulously bonding diamond segments across a wheel's periphery, each segment encasing abrasive diamond grits. Renowned for its exceptional precision, durability, and versatility, segmented sintered wheels excel in cutting and shaping hard materials like granite, engineered stone, and concrete. These precisely positioned segments not only ensure efficient material removal but also diminish heat buildup, resulting in cleaner cuts and prolonged tool life. In a world where precision meets performance, segmented technology remains a driving force, delivering impeccable results across demanding applications.

These precisely positioned segments not only ensure efficient material removal but also diminish heat buildup.

## Performance

## Suitable for:

- ▲ Granite
- Ceramic and Quartz

## Position:

- - Pre-cutting

## Available for:

- Line 10
- Finger-bits
- Corebits
- Stubbing wheels

The only copper bonded metal profiling wheels in the world.

# EHS

Embrace the dynamic world of EHS – the cutting-edge technology that stands for Extra High Speed, redefining the norms of the industry. As the sole fully copper bonded technology for all three metal positions, EHS represents the pinnacle of innovation. It proudly holds the crown as the fastest technology available in the market, empowering clients to achieve remarkable speeds of up to 15,000mm/min (590 inch/min). Symbolizing the very essence of our company, EHS embodies unparalleled efficiency and breakthrough performance. Step into the future of stone fabrication with EHS, where speed and precision converge, setting the stage for unprecedented success and transforming your projects like never before.

### Performance

### Suitable for:

- ▲ Granite
- Ceramic and Quartz
- Marble

### Position:

- 1 - Profiling
- 2 - Profiling
- 3 - Profiling

### Available for:

# Zenith

Welcome to the world of Zenith – the renowned sintered technology by Marmoelettromeccanica, setting a new standard of excellence. Versatility is at its core, as Zenith seamlessly adapts to all materials, making it the go-to choice for both CNC and manual router bits, known as the Professional series. With exceptional performance as its hallmark, Zenith delivers unparalleled results that elevate your stone fabrication endeavors to new heights. Embrace the precision and reliability that only Zenith can provide, as it effortlessly carves its way through any task with unrivaled proficiency. Step into a realm of cutting-edge innovation and experience the zenith of stone processing technology.

Zenith seamlessly adapts to all materials, making it the go-to choice.

### Performance

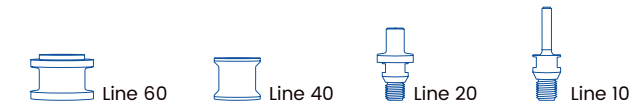

### Suitable for:

- ▲ Granite
- Ceramic and Quartz
- Marble

### Position:

- 1 - Profiling
- 2 - Profiling

### Available for:

A specialized diamond tooling innovation tailor-made for soft materials like marble and travertine.

# Electroplated

Electroplated – a specialized diamond tooling innovation tailor-made for soft materials like marble and travertine. Its unique nature offers a softness of cut, making it a preferred choice for delicate applications on these materials, ensuring precision and finesse. Furthermore, Electroplated technology shines as a hero for super brittle materials, as its gentle touch prevents excessive chipping and fractures during cutting. While it excels in handling softer substances, its adaptability extends to handling even the most fragile materials with grace. Embrace the precision, delicacy, and versatility of Electroplated tools, designed to carve a flawless path through soft and super brittle materials alike.

### Performance

### Suitable for:

- Marble

### Position:

- 1 - Profiling
- 2 - Profiling

### Available for:

# BiPower

BiPower technology – the triumphant third position complementing Zenith, the epitome of innovation. Aptly named for its double duty prowess, BiPower completes the profiling process while simultaneously initiating polishing, making it an indispensable asset in the stone industry. Universally adaptable, this remarkable technology can flawlessly tackle any material, showcasing its versatility and exceptional performance across the spectrum. Embrace the power of BiPower as it revolutionizes your stone fabrication endeavors, seamlessly transitioning from profiling to polishing with unmatched efficiency. Unlock the potential of this game-changing technology and elevate your projects to unprecedented levels of perfection and finesse.

BiPower completes the profiling process while simultaneously initiating polishing.

### Performance

### Position:

- 5 - Polishing
- 6 - Polishing

**Available for:**

# Glossforce 3.0

Glossforce 3.0 polishers – a patented technology that transcends traditional polishing methods. Redefining the industry's landscape, Glossforce goes beyond mere improvements to diamond and resin bonds, completely transforming the structure of the tools themselves. The incorporation of a hybrid intermediate material ensures a fully homogeneous finish across the entire profile shape, setting a new standard for flawless polishing precision. As the pioneering member of a new generation of polishers, Glossforce emerges as the ultimate choice, boasting not only the highest polish achievable but also unparalleled longevity, guaranteeing exceptional performance that stands the test of time.

Step into the forefront of cutting-edge polishing with Glossforce, where innovation meets excellence. Experience the power of a fully perfected finish, crafted with precision and care, as Glossforce delivers unmatched brilliance and longevity. Embrace the future of polishing technology, elevating your projects to the pinnacle of shine and durability. With Glossforce, the highest polish and extended tool life become more than just possibilities – they become your reality.

# Longlife+

Longlife+ Polishers – the trailblazing pioneers of diamond resin bonded polishing wheels. As the very first of their kind in the industry, these remarkable tools continue to set the bar for excellence, delivering an unparalleled level of polish that remains unrivaled to this day. With a legacy of innovation that spans generations, Longlife Polishers showcase their enduring brilliance by consistently achieving the highest polish attainable in the stone industry. Embrace the cutting-edge technology that started it all, as Longlife Polishers elevate your stone polishing endeavors to extraordinary levels of shine, precision, and enduring quality.

An extensive selection of finger bits caters to various cutting needs, ranging from sintered ones with segments for granite and engineered stones to electroplated options ideal for marble and stone. Each finger bit is meticulously crafted using modern and innovative sintered and electroplated processes. With exceptional cutting power and remarkable durability, these finger bits offer the best price-to-quality ratio, ensuring optimum performance and value for your stone cutting endeavors.

Explore an extensive array of core drills designed to excel during the drilling phase. Whether you require sintered core drills with segments for granite and engineered stones or electroplated options suitable for marble, our selection has you covered. Each core drill is meticulously crafted using modern and innovative sintered and electroplated processes. With exceptional cutting power and impressive longevity, these core drills offer an unbeatable price-to-quality ratio, delivering outstanding performance and value for your drilling operations.

Discover precision and speed with Line 60, our flagship CNC profiling wheels. Engineered with a 60mm minimum diameter, this line offers external profiling excellence for stone countertops. Achieve remarkable feed rates and a flawless 30mm internal radius. With options in EHS, Standard, and Electroplated technologies, Line 60 ensures consistency and efficiency in sinkhole creation. Seamlessly integrate using a 35mm bore fitting. Please note that for simple flat profiles, the pre-cutting option may not apply. Elevate your countertop fabrication with Line 60's cutting-edge performance.

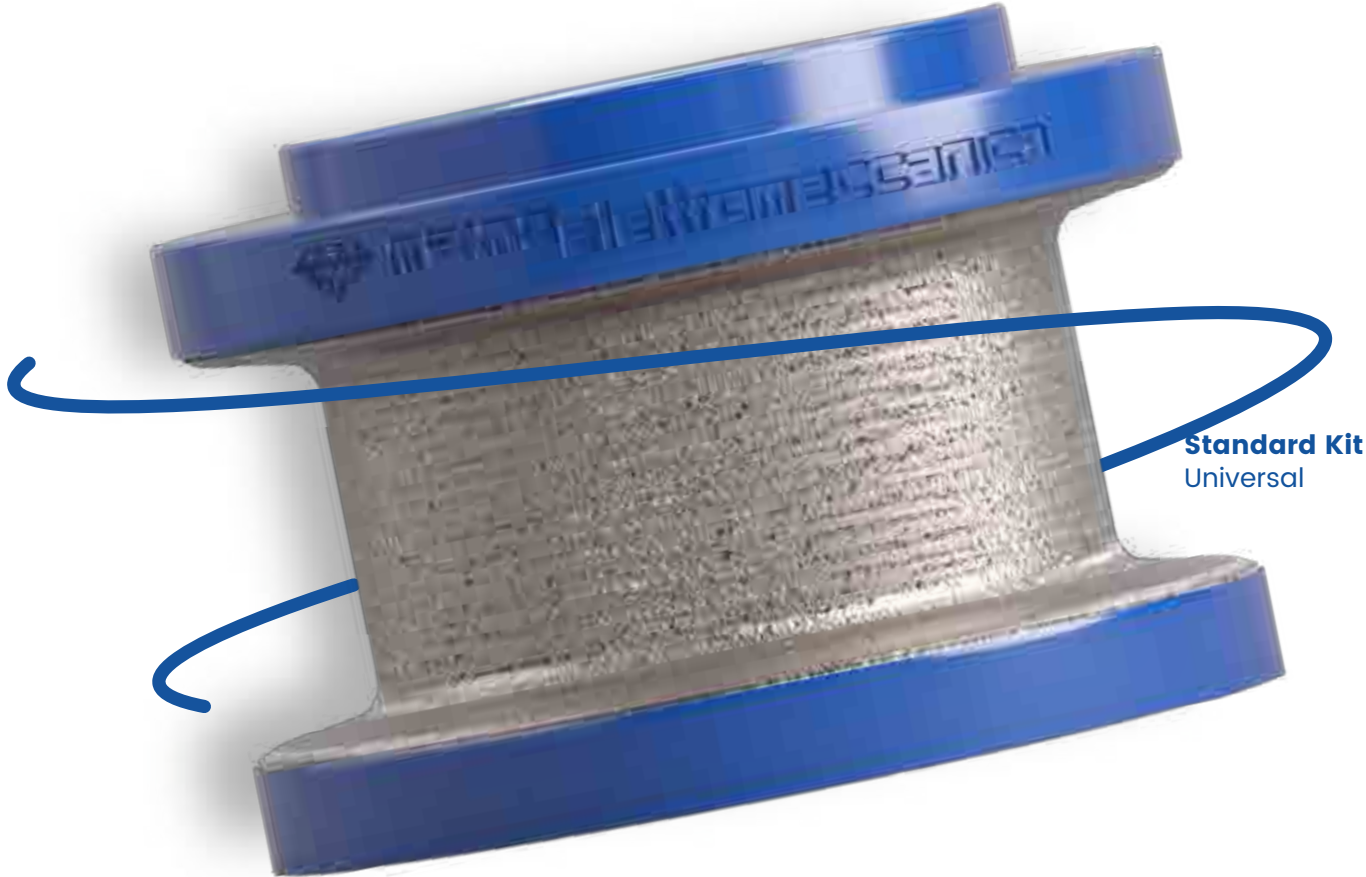

Unleash creativity. We welcome custom profiles, fitting tweaks, and Electroplated technology. Elevate your CNC experience with tailored precision.

The Line 60 sets are available in larger diameters too, please ask our team for further information [ha il menu contestuale](#).

Unleash versatility and finesse with Line 40, the choice for internal and external profiling. Crafted with a 40mm diameter, Line 40 creates a 20mm radius in sinkhole corners while excelling in high feed rates on edges. Choose from EHS, Standard, and Electroplated technologies for precision. Seamlessly integrate using a 22mm bore fitting. Line 40 sets the stage for efficient and polished countertop production.

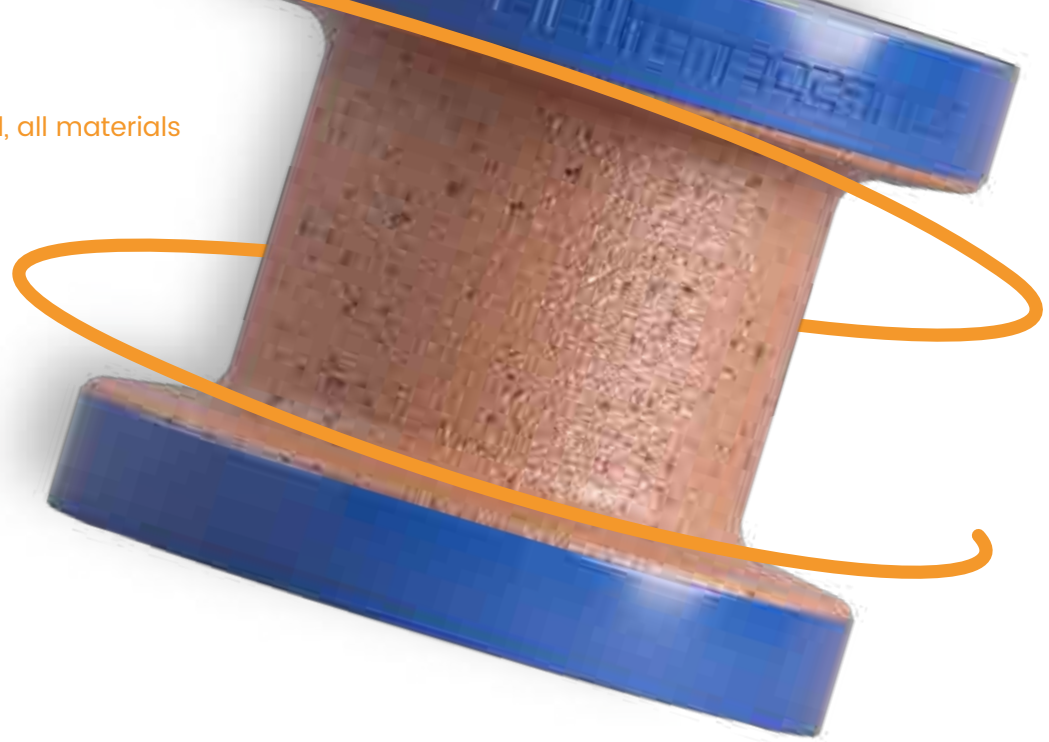

Unleash creativity. We welcome custom profiles, fitting tweaks, and Electroplated technology. Elevate your CNC experience with tailored precision.

Experience perfection in sinkhole design with Line 20. Tailored for internal profiling, these CNC profiling wheels, with a 20mm diameter, create a 10mm radius in sinkhole corners. Choose from Standard and Electroplated technologies, providing options for every need. Seamlessly integrate using a ½" Gas fitting. Elevate your sinkhole fabrication with Line 20's precision and finesse.

Unleash creativity. We welcome custom profiles, fitting tweaks, and Electroplated technology. Elevate your CNC experience with tailored precision.

Elevate your sinkhole detailing with Line 10. Specifically designed for internal sinkhole profiling and polishing, Line 10 features a 10mm diameter, creating a refined 5mm radius. Choose from Standard and Electroplated technologies, catering to diverse needs. Seamlessly integrate using a 22mm bore fitting. Achieve impeccable sinkhole edges with Line 10's specialized composition.

Unleash creativity. We welcome custom profiles, fitting tweaks, and Electroplated technology. Elevate your CNC experience with tailored precision.

Introducing our Recess & Stubbing Wheels collection – a precision-engineered lineup designed to redefine material shaping and profiling. From heavy-duty Super Duty wheels to versatile Segmented options and specialized Electroplated wheels for marble and travertine, we empower countertop professionals with the right tools for every task. With sizes ranging from 50mm to 90mm, our wheels ensure accuracy and efficiency in material removal. Plus, we provide a complete solution – adapters of all sizes are readily available, enabling seamless integration into your existing equipment. Elevate your fabrication process with Marmoelettromeccanica's exceptional tools and comprehensive support.

# Stubbing Wheels

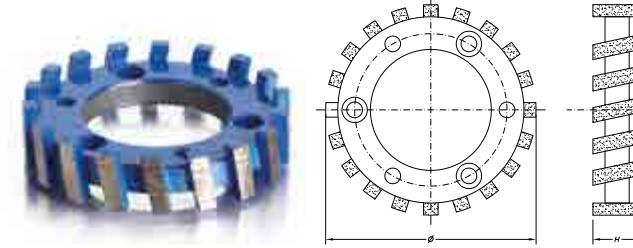

**Super Duty Wheels**

CODE	DESCRIPTION	FITTING
SC03106	H30 - Ø85	3 Hole Ø50 Flange
SC03107	H30 - Ø90	3 Hole Ø50 Flange
SC03111	H30 - Ø50	3 Hole Ø14 Flange

# Drainboard & Grooving Tools

Elevate your countertop craftsmanship with our cutting-edge "Drainboard and Grooving Tools." This meticulously curated collection empowers you to fashion impeccable pitched drainboards, runnels, and intricate grooves. Choose from versatile angle options of 45 or 60 degrees for flawless drainboard edges. Our honed finish bits and polishing discs effortlessly refine grooves in just three swift steps. Crafted with precision, these tools redefine efficiency and perfection in drainage and grooving tasks. From standard designs to customizable solutions, Marmoelettromeccanica is your trusted partner, enabling innovation and precision in every project. Embrace limitless possibilities and reimagine countertop elegance with our unparalleled toolset.

Unveil the artistry within stone with Marmoelettromeccanica's Engraving Tools. A fusion of innovation and precision, our tools redefine stone embellishment. Choose from two dynamic categories: the Double Cutting Edge, seamlessly integrating a ½" fitting, and the Single Cutting Edge, boasting a 10mm diameter shaft for intricate detailing. Craft masterpieces from every angle and inclination, from shallow etchings to profound designs. Elevate your stone engraving with advanced Widia and Tungsten Carbide technologies, ensuring longevity and intricacy. With Marmoelettromeccanica, your creativity takes center stage, shaping timeless elegance in stone. If you seek further insights or customization, we're dedicated to your vision.

# Cones & Adapters

Introducing our versatile adapters, designed to seamlessly integrate with a wide array of custom-designed items. We take pride in our commitment to adaptability, offering a solution that effortlessly accommodates your unique specifications. Our adapters provide the essential link between your distinct creations and various systems, ensuring flawless functionality and optimal performance. With a focus on precision and innovation, our adapters are engineered to empower your creative freedom. Experience the convenience of tailor-made solutions that effortlessly connect your designs to the world, setting new standards in adaptability and versatility.
